

Hi,

Here is the latest edition of current affairs quiz.....

Attempt the quiz and test your level of preparedness

Only important events that took place recently which have a high probability of being asked in exams/interviews are included in the quiz.

I request you to score yourself honestly...

If your score is above 45, congrats...you are a current affairs wizard and I salute you...!!!!!!!

If your score is between 40 and 45, you are good.....and you can become a wizard by putting in an extra bit of hard work.....

If you were able to score between 30 and 40, you have a fairly good knowledge and with hard work, you can improve your score....

If you have a score is less than 30, you need to seriously start putting in more effort to improve your skills if you want to qualify in any exam in which current affairs questions would be there

If you are serious about improving your knowledge of current affairs and ready to spare some time daily for it, please join the facebook group

<https://www.facebook.com/groups/647596659468029>

If you are not serious about your preparation, you need not join the group....I am not looking to increase the size of the group....I need people who can help each other grow and realise their potential.

Thank you and happy reading....

45	Vessel Traffic Monitoring System [VTMS] and Vessel Traffic Services [VTS] are indigenous softwares being developed by Ministry of Shipping for the traffic management at Indian ports. Which Indian institute is developing these softwares?
Ans	<p>B] IIT Chennai</p> <p>The software development was e-launched by Union Minister for Shipping Mansukh Mandaviya</p> <p>VTS and VTMS are softwares which determine vessel positions, position of other traffic or meteorological hazard warnings and extensive management of traffic within a port or waterway. Vessel Traffic Services (VTS) contribute to safety of life at sea, safety and efficiency of navigation and protection of the marine environment, adjacent shore areas, work sites and offshore installations from possible adverse effects of maritime traffic.</p> <p>Vessels Traffic Management Systems are installed in some of the busiest waters in the world, and are making valuable contribution to safer navigation, more efficient traffic flow, and protection of the environment. Traffic flow in busy approach routes, access channels, and harbours can be coordinated safely, in the best interest of port and its users. Incidents and emergency situations can be dealt with quickly. Data from traffic</p>

movements can be stored and used as reference information for port administration, port authorities, coastguards and search and rescue services.

VTMS is mandatory under IMO Convention SOLAS (Safety of Life at Sea). The VTMS traffic image is compiled and collected by means of advanced sensors such as radar, AIS, direction finding, CCTV and VHF or other co-operative systems and services. A modern VTMS integrates all of the information into a single operator working environment for ease of use and in order to allow for effective traffic organization and communication.

Presently, India has approximately 15 VTS systems operational along the Indian Coast and there is no uniformity of VTS software as each system has its own VTS software. With the indigenous software development in progress the recent positive cooperation with office of Director General of Light and Lighthouses (DGLL) on joint development of the indigenous VTMS software development as part of the Aatmanirbhar Bharat initiative will strengthen the cooperation in this area. At the same time, it will benefit the port sector, both in India and region. It is expected that a prototype system will be developed in ten-month time for testing and to operate as a parallel system until it is robust for day to day operations.

Development of the indigenous VTS software will reduce the expenditure of foreign exchange on this issue and also minimize the dependence on foreign support for VTS software. Accordingly, indigenous development of VTS software will benefit with respect to:

- i. Saving of foreign exchange for various VTSs in India.
- ii. VTS Software can be provided to Indian trade friendly nations viz. Maldives, Mauritius, Myanmar, Sri Lanka, Mauritius, Bangladesh and Gulf countries.
- iii. Will also minimize the cost for future upgradations of software.
- iv. Shall be easier to interconnect with MIS/ERP softwares of ports.
- v. Availability of Indian VTS software shall make Indian companies to be competitive commercially in global bids.

Implementation of National Maritime Domain Awareness programme of Indian Navy and NCVTS by DGLL – a real time, interactive aids to navigation system for coastal shipping shall become feasible with Indian VTS software at low cost.

Ministry of Shipping has sanctioned an amount of Rs. 10 Crore to IIT, Chennai for development of indigenous VTS software.

A parting note

Some of you might have found the questions to be tough.

That's because you have not been studying current affairs in the way it should be studied.....slowly, systematically and with a keen attention to detail.

When we read a news item, we concentrate only on the crux of the news and tend to ignore the details. That is fine if you are reading the news just for being informed.

But from an exam point of view, you need to pay attention to each and every minute detail regarding the news and may even have to go for additional reading on the topic.

And don't ever think that you can get yourself upto date in current affairs by studying hard for one or two months just before an exam...

You cannot...because human mind is not programmed to absorb and retain too much information in too little time.

Daily preparation over a long term is a must for becoming an expert in current affairs.

In your busy schedule, it may not be possible for you to prepare daily notes and study.

My endeavour is to provide with daily notes on important current affairs of the day in PDF with explanations, so that you can go through the same at your convenience.

You can download the PDFs and go through the same in chronological order repeatedly....eventually you will become an expert

Then you will be able to answer all the questions in the weekly quizzes

If you want to be good at Current Affairs, please join the facebook group

Expecting to see you in the group....

If you are already a member....congrats...you have taken the first step in becoming an expert in the subject

Thanks and best wishes
